

## Green Economy Dialogue Meeting

*OECD Conference Center, 6 November 2012*

### DRAFT AGENDA

Over the past 18 months *The Green Economy, Green Dialogue* (GED) project convened events in Washington, Paris, Beijing, Tokyo and Brasilia in the lead up to Rio + 20 and invited distinguished academics to contribute peer-reviewed *Green Perspectives* on various aspects of green growth. GED's goal is to promote more effective understanding, policy and action to spur greener economic and social development.

For more information see: [www.green-dialogue.org](http://www.green-dialogue.org)

The Dialogue provides an opportunity to share information from the GED and identify ways for business to interact with the OECD Green Growth agenda and its new Forum on Sustainable Development and Green Growth. Promoting economic growth while pursuing greener development pathways will be a central challenge and common goal for business and government.
